Laura Spina

FRONTEND DEVELOPER

/ About me

I am Laura, a Frontend developer with marketing and copywriting experience. I am very ambitious and I love challenges, besides I like to work in a precise and orderly way. I'm fluent in English, Spanish, Italian and a little bit of French. I can cook very well and I like street photography.

/ Work experience

FRONTEND DEVELOPER

Bravoure | Amsterdam
Jan 2022- present

At Bravoure I work on creative projects focused on design and UX. I can work autonomously on existing codebases and optimising legacy code as well as setting up new projects with latest setup (**NextJs, Typescript, GrapQL**).
The biggest challenges were:
- building a slider that imitated modern social networks like TikTok, making a **web app** feeling like a native application.
- setting up a questionary with a **global state** for the responses.
- I've also successfully integrated **ElasticSearch** to build a **performant** search for different clients.

Everyday I make sure that the code is **reusable, accessible and scalable** so other developers can easily understand it.

JUNIOR FRONTEND DEVELOPER

Openmind part of Accenture Song | Milan
Jan 2021-Dec 2021

I worked as a frontend developer in one of the company leaders in the e-commerce consultancy market. I've learned how to maintain legacy **jQuery** code as well as starting new features in **VueJS.** I've worked on a search setup with **Algolia** and a product finder with Vuejs.
